TALENT OASIS AI · DEEPER PACK

10 Deeper AI Prompts for Educators

Multi-step, chained prompts for educators ready to go beyond the basics — still built with CRAFT.

You already know the basics — this pack is for when a single instruction isn't enough. Every prompt here chains 2–3 steps together in one go: draft something, then refine it, then build the next piece from it, all without starting a new conversation each time. Same CRAFT formula as the Starter Pack — Context, Role, Action, Format, Tone — just doing more work per prompt.

WHAT'S DIFFERENT HERE

- Each prompt does 2–3 things in sequence, not just one — the Action row spells out the full chain.
- Outputs are higher-leverage: full units, complete assessment packages, conference prep — not single drafts.
- Every prompt includes a "Refine Further" line — a natural follow-up to push the output closer to done.

HOW TO USE THIS PACK

- Paste the Full Prompt as-is first — let it complete all steps before you start editing.
- Use the "Refine Further" suggestion as your next message in the same conversation, not a new prompt.
- If a step doesn't fit your situation, say so directly — "skip step 2, just give me steps 1 and 3" works fine.

THE 10 PROMPTS

For Educators Ready to Go Deeper

PROMPT 1 — **Building a Full Unit Plan, Not Just One Lesson**

3-STEP CHAINED PROMPT

C CONTEXT	I'm planning a multi-week unit and want the pacing figured out, not just one lesson at a time.
R ROLE	Act as an experienced curriculum designer.
A ACTION	First draft the unit's learning objectives, then build a week-by-week pacing guide from them, then flag any spots where students commonly struggle.
F FORMAT	3 clearly labeled parts: Objectives, Pacing Guide (by week), Watch-Out Points.
T TONE	Practical and specific — no filler explanations.

FULL PROMPT — COPY & PASTE

```
Act as an experienced curriculum designer. I'm planning a [length]-week unit on [topic] for [grade level]. Do this in 3 parts: (1) Draft 4–6 clear learning objectives for the unit. (2) Using those objectives, build a week-by-week pacing guide. (3) Based on the pacing guide, flag 2–3 points where students commonly struggle with this topic and suggest a quick check-in for each. Keep the tone practical and specific — no filler explanations.
```

PRO TIP: *This is the starter pack's lesson-plan prompt, scaled up — plan the whole unit first, then use Prompt 1 from the Starter Pack to build out any single day in more detail.*

REFINE FURTHER: *Ask "turn week 3 into a full lesson plan" to drop back down to single-lesson detail without starting a new prompt.*

PROMPT 2 — **Creating Three Versions of One Assignment**

2-STEP CHAINED PROMPT

C CONTEXT	I have one assignment but a classroom with a wide range of ability levels.
R ROLE	Act as an instructional coach specializing in differentiation.
A ACTION	First rewrite the assignment at three ability levels, then explain in one line what changed between each version.
F FORMAT	3 labeled versions (Foundational, On-Level, Extension), followed by a short 'What Changed' summary.
T TONE	Practical, ready to hand out as-is.

FULL PROMPT — COPY & PASTE

```
Act as an instructional coach specializing in differentiation. Here is my assignment: [paste assignment]. Do this in 2 steps: (1) Rewrite it into 3 versions — Foundational, On-Level, and Extension — each usable as-is. (2) After all 3, add a short 'What Changed' summary explaining in one line per version what was adjusted and why. Keep everything practical and ready to hand out.
```

PRO TIP: *Paste your actual assignment text in — the more real detail you give it, the less each version will feel like a generic reskin of the same worksheet.*

REFINE FURTHER: *Ask "make the Extension version include a written reflection question" to add rigor without redoing the whole prompt.*

PROMPT 3 — Preparing for a Difficult Parent Conference

3-STEP CHAINED PROMPT

C CONTEXT	I have a parent conference coming up about a sensitive topic and want to walk in prepared, not just hopeful.
R ROLE	Act as an experienced school counselor helping a colleague prepare.
A ACTION	First draft 3–4 key talking points, then anticipate 2–3 tough questions the parent might ask, then draft a calm response to each.
F FORMAT	3 labeled sections: Talking Points, Anticipated Questions, Suggested Responses.
T TONE	Calm, respectful, and non-defensive throughout.

FULL PROMPT — COPY & PASTE

```
Act as an experienced school counselor helping a colleague prepare for a parent conference. The situation is: [describe situation, no student names needed]. Do this in 3 steps: (1) Draft 3–4 key talking points I should lead with. (2) Anticipate 2–3 tough questions or pushback the parent might raise. (3) For each, draft a calm, non-defensive response I could actually say out loud. Keep the tone respectful throughout — this is a real conversation, not a script to read verbatim.
```

PRO TIP: *Describe the situation in general terms (behavior, academic concern, etc.) rather than including identifying student details in the prompt.*

REFINE FURTHER: *Ask "make the responses shorter, like I'm actually saying them in the room" — first drafts often read more like emails than spoken conversation.*

PROMPT 4 — **Building a Complete Assessment Package**

3-STEP CHAINED PROMPT

C CONTEXT	I need more than just a rubric — I want the rubric, an exemplar answer, and an explanation of common mistakes, all aligned to each other.
R ROLE	Act as an assessment specialist.
A ACTION	First build a rubric, then write one exemplar response that would score at the top level, then explain 2–3 common mistakes students make that the rubric is designed to catch.
F FORMAT	3 labeled parts: Rubric (table), Exemplar Response, Common Mistakes to Watch For.
T TONE	Objective and exam-ready, no vague language.

FULL PROMPT — COPY & PASTE

```
Act as an assessment specialist. I'm assessing [assignment type, e.g. 'a
persuasive essay'] for [grade level]. Do this in 3 steps: (1) Build a rubric with
4 criteria and 4 performance levels each, as a table. (2) Write one exemplar
response that would score at the top level on that rubric. (3) Explain 2–3 common
mistakes students make on this type of assignment that the rubric is specifically
designed to catch. Keep the language objective and exam-ready — no vague terms
like 'good effort.'
```

PRO TIP: *Having the rubric and exemplar generated together keeps them consistent — building them separately often leads to a rubric and a model answer that don't actually match.*

REFINE FURTHER: *Ask "now write a response that would score at the lowest level" to get a low-band exemplar too, useful for calibrating with co-teachers.*

PROMPT 5 — Designing a Behavior Support Plan

3-STEP CHAINED PROMPT

C CONTEXT	A student needs a structured plan to address a recurring classroom behavior, and I want something I can actually track over time.
R ROLE	Act as a behavior support specialist.
A ACTION	First describe the behavior pattern clearly and neutrally, then propose 2–3 practical intervention strategies, then build a simple weekly progress-monitoring template.
F FORMAT	3 labeled parts: Behavior Summary, Intervention Strategies, Progress-Monitoring Template.
T TONE	Neutral and non-judgmental — describing behavior, not labeling the student.

FULL PROMPT — COPY & PASTE

```
Act as a behavior support specialist. Here's what I'm seeing: [describe the behavior pattern in neutral, factual terms, no student name needed]. Do this in 3 steps: (1) Summarize the behavior pattern in neutral, factual language. (2) Propose 2–3 practical, classroom-realistic intervention strategies. (3) Build a simple weekly progress-monitoring template I could use to track whether the strategies are working. Keep the tone neutral throughout — describe the behavior, don't label the student.
```

PRO TIP: *Describe the pattern by behavior and frequency ('interrupts during independent work, 3–4 times per period') rather than by diagnosis or label — keeps the plan actionable and avoids the AI guessing at causes it can't know.*

REFINE FURTHER: *Ask "turn the monitoring template into a version I can fill in on my phone between classes" if you need something faster to use in the moment.*

PROMPT 6 — **Drafting a Grant or Funding Request**

3-STEP CHAINED PROMPT

C CONTEXT	I'm applying for classroom or program funding and need a persuasive, well-structured request.
R ROLE	Act as a grant writer experienced with education funding.
A ACTION	First draft a short outline of the request, then expand it into a full narrative, then write a one-paragraph budget justification.
F FORMAT	3 labeled parts: Outline, Narrative (400 words), Budget Justification (100 words).
T TONE	Persuasive but grounded in specifics, not vague enthusiasm.

FULL PROMPT — COPY & PASTE

```
Act as a grant writer experienced with education funding. I'm requesting funding for [what you need funding for] because [why it matters]. Do this in 3 steps: (1) Draft a short outline of the request. (2) Expand the outline into a 400-word narrative. (3) Write a 100-word budget justification explaining how the funds would be used. Keep the tone persuasive but grounded in specifics — avoid vague enthusiasm without evidence.
```

PRO TIP: *Include a real number or statistic about your classroom or students if you have one — funders respond to specifics far more than general statements of need.*

REFINE FURTHER: *Ask "shorten the narrative to 200 words for the summary field" — most grant portals need both a long and short version.*

PROMPT 7 — Mapping Curriculum to Standards

3-STEP CHAINED PROMPT

C CONTEXT	I need to check that my lessons actually align to the required standards, and find any gaps before an audit or review.
R ROLE	Act as a curriculum alignment specialist.
A ACTION	First list the standards I provide, then match each of my lesson topics to the standard(s) it covers, then flag any standards with no matching lesson.
F FORMAT	A table with 3 columns: Standard, Matching Lesson(s), Coverage Gap (Yes/No).
T TONE	Precise and audit-ready.

FULL PROMPT — COPY & PASTE

```
Act as a curriculum alignment specialist. Here are my standards: [paste standards list]. Here are my lesson topics: [paste lesson topics]. Do this in 3 steps: (1) List the standards. (2) Match each lesson topic to the standard(s) it addresses. (3) Flag any standard with no matching lesson as a coverage gap. Present it all as one table with columns: Standard, Matching Lesson(s), Coverage Gap (Yes/No). Keep it precise — this needs to hold up if someone reviews it.
```

PRO TIP: *This works best with your actual standards document pasted in directly — don't summarize it yourself first, since that can hide the exact gaps you're trying to find.*

REFINE FURTHER: *Ask "suggest one lesson idea for each gap" to turn the audit into an actual to-do list.*

PROMPT 8 — Planning a Staff Professional Development Session

3-STEP CHAINED PROMPT

C CONTEXT	I'm running a PD workshop for colleagues and need more than a slide deck — a script and a way to know if it worked.
R ROLE	Act as an instructional coach who designs staff PD sessions.
A ACTION	First build a session outline, then write a facilitator script for the opening 10 minutes, then draft a short post-session feedback survey.
F FORMAT	3 labeled parts: Session Outline, Opening Script (10 minutes), Feedback Survey (5 questions).
T TONE	Confident and collegial — speaking to peers, not lecturing down.

FULL PROMPT — COPY & PASTE

```
Act as an instructional coach who designs staff PD sessions. I'm running a
[length]-minute session on [topic] for [audience, e.g. 'my grade-level team']. Do
this in 3 steps: (1) Build a session outline with time blocks. (2) Write a
facilitator script for just the opening 10 minutes, to set the tone. (3) Draft a
5-question post-session feedback survey. Keep the tone confident and collegial —
you're speaking to peers, not lecturing down to them.
```

PRO TIP: *Ask for the opening script specifically rather than the whole session — a fully scripted hour reads stiffly; a strong open sets you up to run the rest more naturally yourself.*

REFINE FURTHER: *Ask "add one interactive moment to the outline where teachers turn and talk" if the draft feels too lecture-heavy.*

PROMPT 9 — **Designing a Project-Based Learning Unit**

3-STEP CHAINED PROMPT

C CONTEXT	I want to run a project-based unit but need the driving question, milestones, and assessment all working together, not built separately.
R ROLE	Act as a project-based learning (PBL) specialist.
A ACTION	First craft a compelling driving question, then break the project into weekly milestones, then define the final assessment criteria tied back to the driving question.
F FORMAT	3 labeled parts: Driving Question, Weekly Milestones, Final Assessment Criteria.
T TONE	Engaging for students, still rigorous underneath.

FULL PROMPT — COPY & PASTE

```
Act as a project-based learning specialist. I want to run a [length]-week PBL
unit on [topic] for [grade level]. Do this in 3 steps: (1) Craft one compelling
driving question that will frame the whole project. (2) Break the project into
weekly milestones that build toward answering that question. (3) Define final
assessment criteria that tie directly back to the driving question. Keep it
engaging for students, but rigorous underneath.
```

PRO TIP: *A strong driving question usually can't be answered with a single Google search — if the one you get back feels too simple, ask it to make the question more open-ended.*

REFINE FURTHER: *Ask "add a mid-project checkpoint where students present progress" if you want built-in accountability before the final milestone.*

PROMPT 10 — Turning a Rough Idea Into a Full Newsletter Feature Story

3-STEP CHAINED PROMPT

C CONTEXT	I have a great classroom moment or student achievement I want to feature, but only rough notes — not a finished story.
R ROLE	Act as a school communications writer.
A ACTION	First ask me clarifying questions about the story, then draft a short feature based on my answers, then suggest one pull-quote to highlight.
F FORMAT	3 labeled parts: Clarifying Questions, Feature Draft (150 words), Suggested Pull-Quote.
T TONE	Warm and specific — real details, not generic praise.

FULL PROMPT — COPY & PASTE

```
Act as a school communications writer. I want to feature this in our newsletter:
[describe the moment or achievement in a few rough sentences]. Do this in 3
steps: (1) Ask me 2–3 clarifying questions that would make the story stronger.
(2) Once I answer, draft a 150-word feature based on my answers. (3) Suggest one
line from the draft that would work well as a pull-quote. Keep the tone warm and
specific — real detail, not generic praise like 'a wonderful achievement.'
```

PRO TIP: *This is the one prompt in this pack designed to be a real back-and-forth — answer its questions instead of skipping to step 2, and the final draft will sound far less generic.*

REFINE FURTHER: *Ask "write a shorter version for social media, under 40 words" once the feature draft is approved.*

ONE LAST THING

You're Already Past the Starting Line.

If these felt like a natural next step rather than a stretch, that's exactly where you should be — the 28-Day AI Challenge has a full track built for educators who are ready to move past single prompts and into real workflows.

Same structure that got you here: one clear thing to build each day, until AI is just part of how you work — not something you're still figuring out.

Confused is allowed here. So is already knowing some of this.
